HAMILTON

Entry/Exit Nested Tip Stacks

For the Microlab VANTAGE Liquid Handling System

Effortless

Reduced tip reload time with the pre-stacked design and added performance of direct tip loading.

Convenient

Specially designed tear notch for easy handling and unwrapping.

Flexible

Increased flexibility without losing workspace.

Efficient Nested CO-RE Tip Loading and Reloading

To meet customers' growing need for increased flexibility while reducing laboratory space, Hamilton has designed the Entry/Exit Nested Tip Stacks for the Microlab VANTAGE Entry/Exit Module. Designed to support 24/7 and high-throughput operations, the combination of the Entry/Exit Module and Entry/Exit Nested Tip Stacks enables greater workflow efficiency through reduced system setup and tip reload time.

Each Entry/Exit Nested Tip Stack is individually wrapped. The user loads the stack directly into the Entry/Exit magazine, then tears open the pre-scored package from the base of the stack and removes the wrapping in one swift movement.

The compact design of the Entry/Exit Nested Tip Stacks helps users save on shipping costs and storage space.

Design

Entry/Exit Nested Tip Stacks are available for 50 µL, and 300 µL 96-format tips and 50 µL 384-format tips.

- For NTR Rack with 384 tips: 22 Nested Tip Racks
- For NTR Rack with 96 tips: 26 Nested Tip Racks

50 µl 96-format | **300 µl** 96-format | **50 µl** 384-format
